The graph displays the monthly variation of the number of deaths in the United Kingdom from April to January. The x-axis represents time, with labels for April (Apr), July (Jul), October (Oct), and January (Jan). The y-axis represents the number of deaths, with a grid of horizontal lines. A purple line with circular markers shows the monthly death toll. The data shows a general upward trend from April, with a significant peak in December, followed by a sharp decline in January. Vertical dashed red lines indicate the dates of the four general elections: May 1978, July 1979, October 1979, and January 1980.

Month	Deaths (approx.)
Apr	10
May	12
Jun	15
Jul	18
Aug	15
Sep	12
Oct	10
Nov	8
Dec	25
Jan	10

The graph displays the monthly variation of the number of cases in the United Kingdom from April to January. The x-axis represents time, with labels for April (Apr), July (Jul), October (Oct), and January (Jan). The y-axis represents the number of cases, with a scale from 0 to 1,000,000. The data is plotted as a purple line with circular markers at each data point. The graph shows a fluctuating trend with a significant peak in late December. Vertical dashed red lines indicate the dates of the four national lockdowns.

Month	Approximate Number of Cases
Apr	~100,000
May	~150,000
Jun	~250,000
Jul	~400,000
Aug	~200,000
Sep	~150,000
Oct	~200,000
Nov	~100,000
Dec	~900,000
Jan	~200,000

The graph displays the monthly variation of the number of deaths in the United Kingdom from April to January. The x-axis represents the months, with labels for Apr, Jul, Oct, and Jan. The y-axis represents the number of deaths, with a grid line at 1000. The data is plotted as a line with circular markers. There are five vertical dashed red lines indicating specific dates: April 15, July 1, September 1, November 1, and December 1. The number of deaths starts at approximately 1500 in April, drops to a low of about 700 in May, and then fluctuates between 800 and 1200 through June. In July, there is a sharp drop to around 500. The number of deaths then rises to about 1100 in August and remains relatively stable until October. In November, there is a significant increase to over 1500, followed by a sharp drop in December to around 1000, and a final sharp rise to over 1800 in January.

Month	Number of Deaths (approx.)
Apr	1500
May	700
Jun	1200
Jul	500
Aug	1100
Sep	1100
Oct	1100
Nov	1600
Dec	1000
Jan	1800
